

Kairos

Hi, thank you for making time to be here! We're going to spend about 60-75min chatting about Kairos, the AI counselor app that you're all familiar with.

We're going to begin the question with some questions. After that, Ari will demo the product to you so that he can get feedback on it. I'm sure you're aware that we're going to be discussing college and college applications today but please remember there's no right or wrong answers and your honest feedback will be most helpful to help Kairos move forward.

Any questions before we get started?

Introduction

1. I'd like you to start with sharing your name and your favorite activity.

Background

College Counselor

We're going to dive into all things college applications!

1. Are you currently working with a college counselor or thinking about working with one soon?
2. If yes, how did you learn about this counselor?
3. What was your first meeting like? How did you get started?

[if they have a counselor]

4. How do you generally communicate with the counselor?
5. How often do you communicate with them, and who usually initiates it?
6. Is there anything you feel hesitant, embarrassed, or uncomfortable asking your human counselor?
7. What do you like about the counselor?
8. What do you want to change, if anything?

College Applications

1. What do you feel when someone says the words, college applications? Why do you feel this way?
2. What if anything would make you feel differently (more positive, less anxious) about the process?
3. What are the 3-4 most critical things a counselor can help you with? Why did you choose these things?
4. Where do you think you'd want to start? Why?

5. If you could choose your counselor, what are some attributes you'd like her or him to have? Why?

Co-Creation Activity

Now imagine, you have to design an app to help students with applying to college-

1. **Have you used any AI tools (like ChatGPT, Gemini, or school search tools) to help with schoolwork or college research so far? If so, what was that like?"**
2. **What is your biggest worry or boundary when it comes to using AI for something as important as your college applications?**
 - a. **What would help you build trust in the app?**
3. What would you want the experience to be like- use 3 words to describe it.
4. Where would you start?
5. Take a few minutes to draw out the home page- what would you want to see on the home page?
6. What are the top 3 features you'd design? Why?

Prototype Testing

Next, we're going to take you through the prototype. Ari and his team of AI agents have been working hard to develop a prototype. He is going to give you a demo and we'd like your honest feedback on what you're seeing.

1. Landing Page
 - a. What are your thoughts on this screen?
 - b. Do you have any questions?
 - c. What do you expect to happen when you click continue?
2. About
3. Log In
4. Chat
 - a. Would you want this app to feel like a *tool* (like a smart database/checklist) or a *person* (a conversational partner you chat with)? Why?
5. Onboarding
 - a. Screen 1
 - b. Screen 2
 - c. Screen 3
 - d. Screen 4
6. Home Page
7. Matches (7 rounds of questions)
 - a. **How do you feel about filling out responses to all of these questions?**
 - i. **Probe: Do you feel like 7 rounds of questions is too much work, or does it make you trust the final college matches more?**
8. College Matches List
 - a. Expanded Menu

9. Timeline

Features- (Create a prioritized list)

10. Scholarships
11. Recommendations
12. Essay
13. Narrative
14. Mock Interview
15. Activity Evaluation

1. Looking at features like the 'Essay' or 'Narrative' builder—where is the line for you between the AI being a helpful coach versus doing too much of the work for you?
2. Rank these based on usefulness- why did you choose these?
3. Read out top 3- why did you choose these?

Follow-Up Questions

1. Share your thoughts on this prototype?
2. Use 3 words to describe it- read them out loud.
3. How would you describe it to a friend?
4. How likely do you think you are to use it?
 - a. If yes, why?
 - b. If not, what would have to be true for you to use it?

Wrap-Up

1. What are your overall thoughts on the app?
2. **If you had access to Kairos today, would it *replace* a human counselor for you, or would you use it *alongside* one? How would they split the work?**
3. **On a scale of 1-5, how much do you trust the college matches and advice this prototype generated? What would make you trust it more?**
4. Is there anything you'd like to share that we haven't discussed?

Thank you again for your time!
